Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A printer module for a compact printer system, the module comprising:

an elongate body ² having a longitudinal axis;

¹⁰ a stationary printhead housed within said body, ¹⁰ the body having two opposing slots, the slots being parallel to the longitudinal axis and
intrconnected by a paper path which passes through the body: (Fig 3)

^{12 & 12a} powered rollers means for moving a printable media through the paper path and past said
stationary printhead;

¹⁴ an ink reservoir within said body and communicating with said printhead;

a storage device ^{RAM 55} means within said body for storing an image to be printed by said printhead;

and

~~means for transferring said image to said printhead;~~

said printhead printing said image on substantially the full width of said printable media in a single pass. ¹⁰

¹⁰ C. 3, L. 36-37
2. (Original) The printer module of claim 1 further comprising a controller, said controller controlling operation of said printer module. C. 8, L. 40-53

3. (Currently Amended) The printer module of claim 2 wherein said storage device means
for storing said image is flash memory associated with said controller. C. 8, L. 40-53

4. (Currently Amended) The printer module of claim 2 wherein said controller includes said
means a device for transferring said image to said printhead. ⁵¹ Print head driver 62.

⁵¹ 5. (Currently Amended) The printer module of claim 1 further comprising a sensor ⁵¹ means
for detecting said printing media and activating said means for moving said printing media
in response to said detection. C. 9, L. 5-15
